# Build-Finance or Design-Build-Finance Transportation Projects

#### **Types of P3s**

- Design-Build (DB)
- Asset Management Contract
- Design-Build-Finance (DBF)
- Design-Build-Operate-Maintain (DBOM)
- Design-Build-Finance-Operate (DBFO)
- Build-Operate-Transfer (BOT)
- Build-Transfer-Operate (BTO)
- Joint Development Agreement (JDA)
- Concession
- Asset Lease/Sale

#### What is BF/DBF?

- Design-Build, can be Design-Bid-Build
- Public Owner
  - Funds "programmed" and/or in "cost feasible"
     plan in the future, subject to annual appropriation
  - Procurement process for DBF/BF
- Private Team
  - builds the project now
  - borrows the "gap" needed to advance project
  - paid when funds available from public owner

# **Example Cash Flows**

Two Projects Combined	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	Year 7	Total
Public Owner Funds	\$39,411,794	\$26,845,048	\$12,523,824	\$0	\$11,942,894	\$17,204,448	\$12,611,028	\$120,539,036
Contractor Draws	\$2,308,860	\$27,706,314	\$58,875,917	\$24,243,025	\$2,308,860	\$0	\$0	\$115,442,975
Net Cash Flow	\$37,102,935	\$35,741,669	-\$10,860,425	-\$24,243,024	\$9,634,034	\$17,204,448	\$12,611,028	\$5,096,061
Financing	-\$500,000	-\$250,000	\$10,860,425	\$24,243,024	-\$9,634,034	-\$17,204,448	-\$11,900,000	-\$4,385,033
Cash Flow	\$36,602,935	\$35,491,669	\$0	\$0	\$0	\$0	\$711,028	\$711,028

Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	Year 7	Total
\$0	\$0	\$0	\$12,300,000	\$40,000,000	\$40,000,000	\$12,326,300	\$104,626,300
\$9,518,804	\$38,075,216	\$38,075,216	\$9,518,804	\$0	\$0	\$0	\$95,188,041
-\$9.518.804	-\$47.594.021	-\$85.669.237	-\$82.888.041	-\$42.888.041	-\$2.888.041	\$9.438.259	\$9,438,259
							-\$8,725,000
							\$713,259
•	\$0	\$0 \$0 \$9,518,804 \$38,075,216 -\$9,518,804 -\$47,594,021 \$91,300,000 -\$2,375,000	\$0 \$0 \$0 \$9,518,804 \$38,075,216 \$38,075,216 -\$9,518,804 -\$47,594,021 -\$85,669,237 \$91,300,000 -\$2,375,000	\$0 \$0 \$0 \$12,300,000 \$9,518,804 \$38,075,216 \$38,075,216 \$9,518,804 -\$9,518,804 -\$47,594,021 -\$85,669,237 -\$82,888,041 \$91,300,000 -\$2,375,000 -\$2,375,000	\$0 \$0 \$0 \$12,300,000 \$40,000,000 \$9,518,804 \$38,075,216 \$38,075,216 \$9,518,804 \$0 -\$9,518,804 -\$47,594,021 -\$85,669,237 -\$82,888,041 -\$42,888,041 \$91,300,000 -\$2,375,000 -\$2,375,000 -\$40,600,000	\$0 \$0 \$0 \$12,300,000 \$40,000,000 \$40,000,000 \$9,518,804 \$38,075,216 \$38,075,216 \$9,518,804 \$0 \$0 \$0 \$0 \$9,518,804 \$47,594,021 \$85,669,237 \$82,888,041 \$42,888,041 \$2,888,041 \$91,300,000 \$2,375,000 \$2,375,000 \$40,600,000 \$40,600,000	\$0 \$0 \$0 \$12,326,300 \$9,518,804 \$38,075,216 \$38,075,216 \$9,518,804 \$0 \$0 \$0 -\$9,518,804 -\$47,594,021 -\$85,669,237 -\$82,888,041 -\$42,888,041 -\$2,888,041 \$9,438,259 \$91,300,000 -\$2,375,000 -\$2,375,000 -\$2,375,000 -\$40,600,000 -\$40,600,000 -\$11,700,000

# Goals of Innovative Financing Program

- Significantly Accelerate Projects State
   Transportation Improvement Program
   (STIP)/Long Range Transportation Program
   (LRTP)
- Create Jobs Now Economic Stimulus
- Construction costs locked at today's pricing
- Projects completed more quickly allow public usage faster

#### What are the Benefits of DBF?

- Accelerate High Profile Projects
- Economic Stimulus/Jobs
- Private Sector Expertise
- Use "Others" Money to Advance Project
- Promote Innovation in Project
   Development and Delivery

# When Might BF/DBF Make Sense?

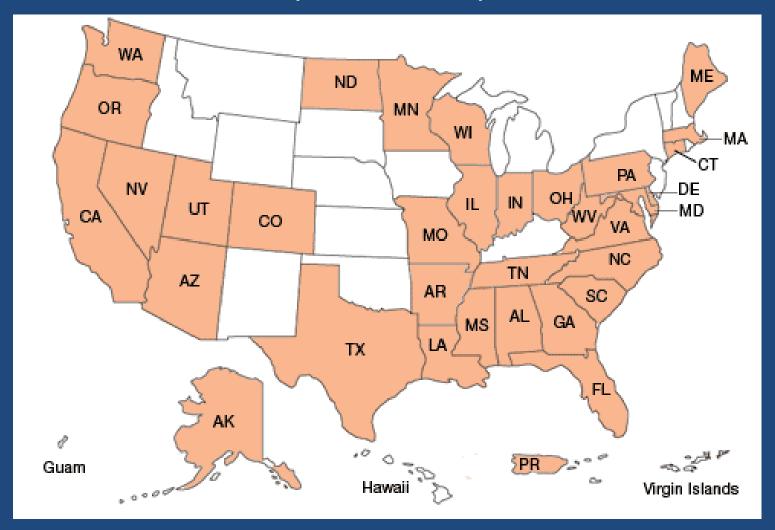

- Desire for economic stimulus
- Periods of highly competitive industry pricing
- Breaking up projects that could/should go together due to funding
- Key safety issues like closed/posted bridges
- Interest rates favorable compared to inflation of construction costs
- Public sector does not want to borrow funds long term

#### What is Driving DBFs?

- Putting people to work!
- Strong industry competition good prices
- Funding challenges for medium to larger projects
- Changing financial markets/tools
- Legal authority for P3 opened up
- Bottom line BF/DBF can advance projects

# States with P3 Legal Authority

(source - US DOT)

#### **Environment for Success**

- Outside the Box Thinking
- Political Support
- Project Champions
- Understanding/willingness to take risk
- P3 "owner" processes
- Select the right projects

# Florida DOT Case Study

- FDOT started first DBF in 2004 and has now advanced twelve DBF/BF projects between 3 to 6 years totaling over \$2.4 billion
- All projects were at or below the programmed future estimated cost and available funding
- FDOT requires 100% Performance Bond on DBF Projects
- Gap Funding Consider "Below the Line" by FDOT, meaning responsibility of Private Team

# Florida DOT Case Study

- Traditional Design-Build adds gap financing by the D-B team
- Generally used for "medium size to large" projects - \$50M to \$500M or larger
- Bank Loans loans are generally debts of the contractor
- New Bond Approach tax-exempt bonds issued by "local government issuer" nonrecourse to contractor – funded two recent FDOT DBF projects

#### **DBF Challenges**

- New approach for DOT, industry, Surety
- Banks "qualify" contractors, can eliminate some prequalified contractors
- Bank loans "complication" for Surety company
- Conflicts over "cure/step-in" rights in the case of default between Surety and Bank
- Timing of funds for added work/valid claims
- Directing payment from public owner
- "Offset" provisions

#### **Market Forces Solve Challenges**

- DOTs made changes to make the "gap financing" more "bankable"
  - waive offset;
  - fund additional work in real time
  - Set priority to future contract payment in the overall DOT's program
- New tools developed to advance gap funds
- Surety partnering on BF/DBF projects
- Industry getting "smarter" on BF/DBF

### Florida DOT Sample Results

- 2012 Project Examples:
  - I-95 Brevard/Volusia DBF Project
    - Capped Amount \$120,539,036
    - Proposed Amount \$118,370,00 (includes cost of financing, plus added 16 miles of widening)
  - Jacksonville 9-B DBF Project
    - Capped Amount \$104,626,299
    - Proposed Amount \$ 94,901,300 (includes cost of financing, plus all "bid options")

#### **BF/DBF Process**

- DOT Selects Projects Procurement of BF/DBF Team
- Eligible Contractors from DOT's Prequalified List
  - ➤ DBF Bond Method provides all prequalified Contractors equal access to Financing
- "Typical" DOT Competitive Procurement Process
  - BF "Low Bid" Approach
  - DBF "Best Value" Approach (RFQ/RFP)
- Interactive review of Bid Documents/DBF Agreement
- BF/DBF Team responsible for providing "Gap" Financing
- Contract/Financial Close Implement Project
- DOT is in <u>Total Control</u> of Process

#### **Lessons Learned**

- Public Owners don't reinvent the wheel:
  - Use laws in place like P3/D-B legal authority
  - D-B standards/process, procurement approach
  - Performance guarantee standards/process
- Public Owners keep "gap financing" simple:
  - Be clear on when future funds are available
  - Be clear on timing of funds for added work
  - Be clear on "requirements" and flexible to adjust as lessons learned
  - Recognize there is a financing i.e., waive offset

#### **Conclusion**

- BF/DBF is a new tool to added to the tool box
- Don't reinvent the wheel
- Pick the "right" projects
- Have industry "sounding sessions"
- Solid procurement process
- Public owner be flexible where possible
- Market responds to BF/DBF approach
